

SUBJECT INDEX

A

- Abdominal skin, compared with scrotal, 337
- Acantholysis, electronmicroscopy of, 373
- Acetate, in fats and nucleic acids, 431
- Adenomas, eccrine gland, histochemical carbohydrates in, 407
- Aluminum chloride, GSR to, 7
- Amino compounds, dihydroxyacetone and, 284
- Ammonia nitrogen of epidermis, 86
- Anaphylaxis, cyclophosphoramide and, 235
- Antibiograms of staphylococci, 273
- Antibiotics, response of corynebacterium acnes to, 426
- Antibodies, to *T. mentagrophytes* and to *T. rubrum*, 156
- Apocrine glands, histochemistry of, 79
- Arginine synthetase, and Krebs-Henseleit cycle, 291
- Atopic dermatitis, sulfhydryl in, 32
- Auto-transplants, effect of stroma on, 109

B

- Bacteria, of amputation stump skin, 165
- Banthine, GSR to, 7
- Basal cell epithelioma, epidermal sulfhydryl in, 31 pigmenting, 299
- Blood, whole, used for passive transfer, 55
- Bromphenol blue, for visualizing sweat, 3

C

- C¹⁴ acetate, lipids of dog skin and, 239
- C¹⁴ isoleucine, lipids of dog skin and, 239
- Callus, dihydroxyacetone and, 283 lipids of, 201
- Candida albicans, inhibition of with human serum, 383
 - Pagano-Levin medium and, 403
- Capillary permeability, Coomassie blue and, 37
- Capillary responses, in psoriatic skin, 225
- Carbohydrates, of apocrine and eccrine glands, 79 of benign eccrine gland tumors, 407
- Carcinogenesis, chemical, effect of ultraviolet light on, 73
- Castroviejo Keratome, 303
- Chloramphenicol, response of corynebacterium acnes to, 426
- Chromatography, of psoriatic scales, 203
 - of *T. mentagrophytes* and *T. rubrum*, 156
- Colchicine toxicity, griseofulvin and, 5
- Cold urticaria, histamine metabolism in, 17
- Collagen, in inflamed skin, 454
- Condyloma acuminatum, epidermal sulfhydryl in, 31
- Contact dermatitis, sulfhydryl in, 32

- Contact-type allergy, transfer of with whole blood, 55
- Coomassie blue, as indicator for capillary permeability, 37
- Corynebacterium acnes, antibiotic sensitivity of, 423
- Cryolite, effect of on rabbit eye and skin, 183
- Cyclophosphoramide, inhibition of anaphylaxis with, 235
- Cytoxan®, see cyclophosphoramide, 236

D

- Darier's disease, sulfhydryl in, 32
- Definitions, dermatologic, 441
- Dermabrasion, migration of melanocytes and, 99
- Dermal-epidermal junction, electronmicroscopy of, 213
- Dermatofibroma, epidermal sulfhydryl in, 31
- Dermatologic definitions, 441
- Dermatophyte polysaccharides, chemistry and immunology of, 155
- Dictionary, dermatologic, 441
- Dihydroxyacetone, and human callus, 283
 - and amino compounds, 283
 - properties of, 233
- Dinitrochlorobenzene, passive transfer of allergy to, 55
- Diphtheroids, of amputation stump skin, 165
- DNA, autoradiography of, 321
 - in the psoriatic lesion, 417
 - of psoriatic scales and callus, 205
 - synthesis of in rat skin, 321
- Dog skin, lipids of, 169, 237

E

- Earl D. Osborne Fellowship, announcement, 61
- Eccrine ampulla, morphology and function, 171
- Eccrine glands, histochemistry of, 79
- Eccrine poromas, histochemical carbohydrates in, 407
- Eccrine sweat, dye clearance and, 259
- Eccrine sweat gland, effect of salt intake on, 327
- Eccrine sweating, Wada method modification, 167
- Electronmicroscopy, of acantholysis, 373
 - of dermal-epidermal separation, 213
 - of pigmenting basal cell epithelioma, 299
- Enzymes of Krebs-Henseleit cycle, 287
- Epidermal barrier, in scrotal and abdominal skin, 337
- Epidermal sulfhydryl, 29
- Epidermis, electronmicroscopy of, 65
 - nitrogenous composition of, 83
- Epithelial cells, effect of stroma on transplant of, 109

Erythema chronicum figuratum melanodermicum, 460

Erythema dyschromicum perstans, 457

Erythema, effect of methoxsalen on, 193

Erythromycin, response of corynebacterium acnes to, 426

Esch. coli, of amputation stump skin, 165

Exfoliative dermatitis, sulfhydryl in, 32

F

Fat, inflamed skin, 454

Fatty acids, of dog skin, 169

G

Galvanic skin response to topical remedies, 7

Granular layer, stratum oxybioticum and stratum anoxybioticum of, 63

Griseofulvin, and colchicine toxicity, 5

H

Hair roots, auto-transplants of, 112

Halo nevus, 47

Healing, wound, mast cell depletion and, 189

HeLa cell culture of herpes simplex virus, effect of hydrocortisone on, 89

Herman Beerman Lecture, announcement of, 231

Herpes simplex virus, culture of, effect of hydrocortisone on, 89

Hexosamine, in inflamed skin, 453

Histamine, metabolism of in cold urticaria, 17

Histidine, in urticaria pigmentosa, 253

Hydrocortisone, effect of on psoriatic lesion, 417
prolonged external application of, 11

tissue culture of herpes simplex virus and, 89

Hydroxyindoleacetic acid, in rosacea, 405

Hydroxyproline, in inflamed skin, 453

Hyperuricemia, and psoriasis, 105

I

Ichthyosis, sulfhydryl in, 32

Inflammation, chemistry of, 451

International Congress of Dermatology, announcement of, 159

K

Keratin of psoriatic scales and callus, 205

Kerato-acanthoma, epidermal sulfhydryl in, 31

Keratome, Castroviejo, 303

Krebs-Henseleit cycle, enzymes and, 287

L

Lichen planus, sulfhydryl in, 32

Lichen simplex chronicus, sulfhydryl in, 32

Lipids, gravimetric determination, 293

of dog skin, 169, 237

of psoriatic scales, 201

Lithium bromide, effect of on skin, 359

M

M. furfur, experimental infection with, 393

Mast cell depletion, and wound healing, 189

Mast cell, strain for, 1

Melanin granule, electronmicroscopy of, 23

Melanocyte, electronmicroscopy of, 23

migration of following dermabrasion, 99

Melanosome, site of melanogenesis, 243

Melanotic nevi, transplant into vitiliginous skin, 47

Methoxsalen, effect of on normal skin, 193

Methylene blue, clear of in eccrine sweating, 271

Miliaria, eccrine gland in, 180

N

Negroes, nevus Ota and nevus Ito in, 133

Nevi, melanotic, transplant of, 47

Nevus, epidermal sulfhydryl in, 31

Nevus Ito, 133

Nevus Ota, 133

Nitrogen, in inflamed skin, 453

Nitrogenous composition of epidermis, 83

Non-protein nitrogen of epidermis, 86

Novobiocin, response of corynebacterium acnes to, 426

Nucleic acid bases of psoriatic scales and callus, 204

P

P. orbicularis, experimental infection with, 393

Pagano-Levin medium, candida albicans and, 403

Passive transfer of contact type allergy with whole blood, 55

Pemphigus vulgaris, electronmicroscopy of acantholysis of, 373

Penicillin, response of corynebacterium acnes to, 426

Perfused skin, metabolic pathways of, 431

pH, of diseased skin, 307

of normal skin, 305

Phage types of staphylococci, 273

Pigmenting basal cell epithelioma, 299

Pityriasis rosea, sulfhydryl in, 32

Polysaccharides, of dermatophyte, chemistry and immunology of, 155

of T. mentagrophytes and T. rubrum, 156

Poromas, histochemical carbohydrates in, 407

Potassium, in the psoriatic lesion, 417

Prantal, GSR to, 7

Progestins, effect of on sebaceous gland, 309

Protein, in inflamed skin, 454

Psoriasis, hyperuricemia and, 105

Psoriatic lesion, effect of hydrocortisone on, 417

Psoriatic scales, chemical composition of, 199

Psoriatic skin, capillary responses in, 225

R

Radiant heat, compact high intensity, 241
RNA of psoriatic scales and callus, 205
Rosacea, 5-hydroxyindoleacetic acid and, 405

S

Salt, effect of on eccrine sweat gland, 327
Sarcina, of amputation stump skin, 165
Scrotal skin, compared with abdominal, 337
Sebaceous gland, effect of progestational agents on, 309
Seborrheic keratosis, epidermal sulfhydryl in, 31
Sebum, gravimetric determination, 293
Senile keratosis, epidermal sulfhydryl in, 31
Serum, human, inhibition of yeast growth with, 383
Skin, thin sheets with Castroviejo Keratotome, 303
Sodium fluosilicate, effect of on rabbit eye and skin, 183
Squamous cell carcinoma, epidermal sulfhydryl in, 31
Staphylococci, antibiograms and phage types of, 273
 of amputation stump skin, 165
Steroid, prolonged external application of, 11
 tissue culture of herpes simplex virus and, 89
Stratum anoxybioticum, of granular layer, 63
Stratum corneum, in auto-implants and in ex-
 plants, 345
Stratum oxybioticum, of the granular layer, 63
Streptococci, of amputation stump skin, 165
Streptomycin, response of corynebacterium *acnes*
 to, 426
Stroma, and auto-transplants, 109
Sulfhydryl, in epidermis, 29
Sulfonamides, response of corynebacterium *acnes*
 to, 426
Sweat, bromphenol blue for visualization, 3
 eccrine, dye clearance and, 259
Sweat gland ampulla, eccrine, 171

Sweat gland, eccrine, effect of salt intake on, 327
Sweating, modification of Wada method in, 167
Syphilis, sulfhydryl in, 32
Syringomas, histochemical carbohydrates in, 407

T

T. mentagrophytes, polysaccharides of, 156
T. rubrum, polysaccharides of, 156
Terry's stain, permanent, for mast cells, 1
Tetracycline, response of corynebacterium *acnes*
 to, 426
Tinea versicolor, experimental infection with, 393
 factors in susceptibility to, 389
Transfer, of contact type allergy, 55
Transplants, auto-, effect of stromal environment
 on, 109
Tricarboxylic acid cycle, in dog skin, 431

U

Ultraviolet light, effect of on chemical carcino-
 genesis, 73
 effect of methoxsalen and, 193
Urea nitrogen of epidermis, 86
Uric acid, in psoriasis, 105
Urticaria, cold, histamine metabolism in, 17
Urticaria pigmentosa, histamine metabolism in,
 253

V

Verruca vulgaris, epidermal sulfhydryl in, 31
Vesiculation, lithium bromide effect on, 359
Vitiligo, transplant of melanotic nevi into, 47

W

Wada method, modification of, 167
Water, in inflamed skin, 454
Wax alcohols, of dog skin, 169
Wound healing, mast cell depletion and, 189

Y

Yeasts, inhibition of by human serum, 383
